SENIOR FULL STACK SOFTWARE ENGINEER **9+ YEARS**

Senior full stack engineer with nine years across the C#/.NET stack, Flutter and modern frontend development. Owns projects end to end, from backend architecture, APIs and data modelling through to production, for leading international hotel groups and top-tier e-commerce platforms. Now expanding into modern AI-native and agentic software development, combining established software engineering experience with emerging AI-driven development practices.

EXPERIENCE

Senior Full Stack Software Engineer — Hyntech LTD (*Remote*)

2019 — Present

- Own all Umbraco CMS–based .NET projects end to end, from solution architecture, Umbraco setup and configuration, custom development and CI on Appveyor/Azure app service through to production.
- Design and ship cross-platform Flutter applications for web, iOS and Android, publishing through the App Store and Google Play developer consoles.
- Build, test and maintain Shopify, WordPress, Wix and Squarespace storefronts and sites, including bespoke Liquid themes, plugins and scripts.
- Integrate third-party services, booking engines, payment gateways, Google Analytics and Maps APIs, REST endpoints across client platforms.

C#, .NET, Flutter, Laravel, JavaScript, SCSS, Gulp, MSSQL, MySQL, Microsoft Azure, Git, Appveyor, Laravel Forge, Cloudflare, SAML, Node.js, Cloudflare CDN

Full Stack Software Engineer — Textus Technology Pvt Ltd

2016 — 2019

- Developed and maintained windows based application and web applications tooling in .NET and MSSQL.
- Delivered backend services and admin tooling in PHP/Laravel and .NET against MySQL and MSSQL.

PHP, Laravel, C#, jQuery, HTML, CSS, SCSS, MySQL, Github

Junior Software Engineer — EDATA Lanka Technologies

2015 — 2016

- Maintained and extended an in-house POS platform and its content management system, both built as C# Windows desktop applications.

C#, .NET Framework, Entity Framework, Windows Forms, MSSQL, REST APIs, GitHub
